**KEY  
SUCCESS**

# POWER OF BLOCKCHAIN

## Borderless

Cryptocurrency is making waves in the advocacy for decentralization within the financial industry, providing solutions for cross-border transactions and transparent, immutable data via blockchain technology.

## Trustless

" Trustless " means that you don't have to trust a third party : a bank , a person , or any intermediary that could operate between you and your cryptocurrency transactions or holdings .

## Trust, Sincerity & Future

A smart contract, like any contract, establishes the terms of an agreement blockchain is a completely decentralized, open and transparent data, fair and just system for global. After the most rigorous mathematical model deduction, it has the most rigorous control model + market operation mechanism + blockchain technology and is committed to building the world's first blockchain decentralized split platform. This is a subversive and innovative system that can bring huge benefits to users around the world. This is an excellent opportunity to achieve financial freedom together. The future has arrived, and we are looking forward to walk with you!

## Blockchain

Blockchain Technology does not rely on additional third-party management agencies or hardware facilities, and there is no central control. Except for the self-contained blockchain itself, through distributed accounting and storage, each node realizes information self- verification, transmission and management. Decentralization is the most prominent and essential feature of blockchain.

## Endless

All financial transactions on the platform are carried out instantly in automatic Mode on Blockchain . If you say that something is endless , you mean that it is very large or list for a very long time , and it seems as it will never stop

# PUTO NETWORK

Puto Network is a Decentralized Smart Contract based project on BSC CHAIN NETWORK, which means a shared, immutable ledger that facilitates the process of recording transactions and tracking assets in a business network.

No one can change or edit any data or transactions. The Developer also can't withdraw the balance from your Smart Contract, even they can't edit anything too. Only you can withdraw.
